Seeking a part-time student job

PERSONAL PROFILE

Data & AI Engineer on a clear track: a Bachelor's in Data Engineering and Systems (UPM, completed in the standard 4 years), 1.5 years of professional experience at Endesa and Mática Partners, and now a two-year MSc in Data Science, specialising in Finance & FinTech, at Aarhus University — the next step toward a long-term career in Denmark. Hands-on experience across the full data lifecycle, from ETL and predictive modelling to multi-agent LLM systems and RAG pipelines, plus a year in the Nordic region during an Erasmus+ exchange in Västerås, Sweden. Looking to combine the Master's with a part-time student job in data/AI over the next two years, and plan to start learning Danish once settled in.

WORK EXPERIENCE

AI Consultant – Mática Partners
Jan 2026 – Jul 2026 | Madrid, Spain

*Mática Partners is a Spanish data & AI consultancy (est. 2018, ~150 employees, offices in Madrid and Barcelona) delivering Big Data, Advanced Analytics and applied-AI solutions across sectors. I **reported directly to the CEO**, who assigned me a series of independent client projects rather than a fixed team role.*

- Completed intensive training in **LangGraph and LangChain** to build **multi-agent LLM systems**.
- Optimised the clustering algorithm of the vector store powering the firm's internal AI assistant, improving retrieval performance by **4.7%** through hierarchical and Agentic Chunking.
- Prototyped a Playwright-based autonomous agent to detect front-end bugs across web deployments.
- Led a Databricks proof-of-concept for PepsiCo evaluating the platform's analytics and KPI tooling; concluded Databricks was not yet mature enough for a company-wide migration, but recommended it as the strongest long-term option once the platform stabilises.
- Delivered a proof-of-concept for UN Tourism (UNWTO): automated document generation from their Oracle database, identifying and resolving all **23 errors** found during analysis.
- Completed the **Claude Code certification** programme, contributing to Mática's partnership with Anthropic.

Operation & Maintenance Improvement – Endesa
Sept 2024 – Sept 2025 | Madrid, Spain (Hybrid)

Endesa is one of Spain's largest electric utility companies. I joined as a trainee analyst within the Operations team, brought in to cover data-analysis capacity the department did not have in-house.

- Analysed the Spanish electricity system through data collection, cleaning and normalisation.
- Applied machine learning (predictive models) using **Python and Scikit-learn**.
- Automated reporting with PI System, Pandas and SQL, including a daily automated performance report with charts for every power plant across the Canary and Balearic Islands.
- Reduced ETL processing times by **35%**, improving operational efficiency in electricity system management.
- Collaborated cross-functionally in an Agile working environment with multiple technical teams.

Private Tutor – Freelance
Sept 2021 – Sept 2023 | Madrid, Spain

- Individualised teaching in STEM subjects to secondary and high school students.
- Developed teaching materials and adapted methodologies to each student's profile.
- Built the ability to explain complex technical concepts clearly, useful in data storytelling contexts.

ADDITIONAL EXPERIENCE

- Sports Instructor – Liceo Europeo, June 2022 – July 2022 | Madrid, Spain
- Lifeguard – AquaGlass SL, June 2019 – July 2019 | Madrid, Spain

PROJECTS

BotLLM – AI Appointment Management Bot & Website (Personal Project)
2026

github.com/DaniGV63/BotLLM

- Built an AI-powered WhatsApp appointment-management bot with its own website for a physiotherapy clinic client, covering the whole development cycle end to end — a first hands-on introduction to full-stack development.

Article Publication in MDPI Open Access Journals: Gesture Recognition Using Electromyography and Deep Learning *Completed: Nov 2024*
mdpi.com/2673-4591/82/1/38

- Signal processing using STFT and CQT for feature extraction.
- Trained CNN networks, achieving **90% accuracy**, surpassing previous benchmarks of 85%.

EDUCATION

MSc in Data Science, specialisation in Finance & FinTech *2026 – 2028 (in progress) | Aarhus, Denmark*

- **Aarhus University** (120 ECTS)
- Coursework: Advanced Statistical Learning, Large Scale Optimization, Data Visualization, Business Data Analysis, Microeconometrics, Time Series Econometrics, Quantitative Financial Economics, Investment and Finance, Financial Intermediation; Master's thesis.

Bachelor's Degree in Data Engineering and Systems *2020 – 2024 | Madrid, Spain*

- Universidad Politécnica de Madrid (ETSIT)
- First cohort of this newly launched programme; completed in the standard 4-year timeframe for a Spanish Bachelor's degree (240 ECTS).

Erasmus+ Exchange Programme *2023 – 2024 | Västerås, Sweden*

- Mälardalen University (computer science)— one-year exchange, giving first-hand experience of the Nordic academic and work culture.

CERTIFICATIONS

- Official Claude Code Certification – Anthropic, 2026 | Madrid
- TOEFL iBT English — Level C1 (Score: **100**), December 2025 | Madrid
- Organisational Management, Key Competencies and Data Analytics Programme – UCJC, 2024–2025 | Madrid
- Aquatic Lifeguard – Community of Madrid (RFESS), 2019 | Madrid

LANGUAGES

- Spanish — Native
- English — C1 (TOEFL iBT, score 100)
- Danish — Planning to start lessons once settled in Aarhus

TECHNICAL SKILLS

- Languages & Tools: Python, SQL, SAS, PI System, Pandas, Scikit-learn, TensorFlow, FastAPI, Git, GitHub, Docker, Nginx, Redis, LangGraph, LangChain, FAISS, Tree-sitter, Playwright
- Data Processes: ETL, Data Wrangling, Normalisation, Data Pipelines, Data Modeling
- Machine Learning & AI: Predictive models, Deep Learning, Neural Networks, Signal Classification, Benchmarking (Precision@K, MRR), Codex (OpenAI), Claude Code (Anthropic)
- Big Data & Cloud: Spark, Hadoop, AWS/GCP/Azure, Data Warehousing, PostgreSQL, MongoDB, Docker Compose, Hetzner VPS
- Methodologies: Agile, Scrum
- Soft Skills: Analytical Thinking, Proactivity, Collaboration, Technical Communication

INTERESTS

Socialising with friends over a drink, playing sports — padel and football in particular — and board games, especially Catan (I'm quite good at it).

VOLUNTEERING

- Social Activities – Endesa Foundation, 2023 | Madrid
- Food Collection – Madrid Food Bank Foundation, 2023 | Madrid
